Level design is the foundation I build every project on: it's what gives players the desire to progress, to explore, to get lost, and to want to discover more. I treat it as an iterative craft, playtesting relentlessly to hit the team's pacing goals and layering in scripted moments that keep exploration alive and rewarding, until the experience feels truly immersive. My QA background reinforces that process, sharpening a rigorous eye for testing and a fascination with how the spaces we design shape player behaviour.

EXPERIENCE

Microids Sept. 2025 – Feb. 2026
QA Tester – Internship Paris, France

- Tested several AA multiplatform titles across PS5, Xbox Series, PC, and Nintendo Switch.
- Reported bugs with clear severity levels, reproduction steps, and version tracking in a shared database.

Blacktool.tv Jan. – Feb. 2024
3D Generalist – Internship Paris, France (hybrid)

- Created simplified characters, props, and environments in Blender for an unreleased stop-motion miniature series with a motion design visual approach.
- Produced clean, lightweight assets with consistent topology and UV unwrapping suited for physical miniature integration.
- Performed texturing tests in Substance Painter and animation tests in Blender to match the intended stop-motion aesthetic.

PROJECT

The Light Above – Final Year Video Game 2024 – 2026
Lead · Level Designer · Tech Artist Brassart, Nantes

- Designed and iterated on all game levels in Unreal Engine 5, focusing on player guidance, visual framing, flow, pacing, and narrative readability.
- Developed a project-wide master material as Tech Artist, supporting vertex painting, flexible material adjustments, and efficient asset integration across the full team.
- Contributed to art direction, defining visual references and maintaining visual consistency across environments.
- Provided cross-discipline support across art and development pipelines, including rigging and skinning of both playable characters.
- Led a team of 5 over a 9-month production cycle via Jira: milestone planning, task distribution, and regular team communication.

EDUCATION

BRASSART – School of Digital Creation 2022 – 2026
4-Year Bachelor's Degree – Game Design & Interactive Media Nantes, France

- Generalist 3D training: modeling (LP/HP), retopology, rigging, animation, UV unwrapping, texturing.
- Level Design focus in UE5: blockout/grayboxing, composition, player guidance, pacing, PCG, Blueprint scripting.
- Tech Art skills: master materials, shaders, trim sheets, modular kits, texel density, collision, optimization.

IUT de Laval 2020 – 2021
Multimedia & Internet Professions (MMI) – course not completed Laval, France

- Foundations in visual communication, project management, and digital content production.

SKILLS

3D & Art	Blender · Maya · 3ds Max — Modeling (LP/HP), Retopology, Rigging, Animation
Texturing	Substance Painter · Substance Designer — Realistic & Stylized, Procedural Workflows
Engine	Unreal Engine 5 — Blueprint, PCG, Master Materials, Shaders, Lighting, Asset Integration
Level Design	Blockout / Grayboxing · Flow & Pacing · Composition · Player Guidance · Narrative Design
Production	Jira · ClickUp · Miro — Milestone tracking, task distribution, team coordination
Languages	French — Native English — Fluent Spanish — Intermediate

INTERESTS

Human behaviour	Sociology and how people engage with spaces, systems and experiences
Sport	Running — for discipline and long-term focus
Nature	Outdoors as a way to recharge creatively and gain perspective
